LOOK AT THE
BIGGER PICTURE

When you start to do the math on work at height, the old way of doing things just doesn't add up.
But there's a better way...

COST OF AN INJURY

FALLS FROM HEIGHT
COST BUSINESSES APPROXIMATELY
$6.09 BILLION
IN DIRECT COMPENSATION COSTS

AMOUNTING TO
~$132,377
PER INJURY

18% of all nonfatal work-related injuries that result in days away from work are caused by SLIPS, TRIPS AND FALLS.

31% of fall-related fatalities occur at 15 FEET OR LOWER.

Wasteful motion from climbing a ladder can cost more than **$5,500** PER WORKER A YEAR.

Wasteful motion and fatigue increase the risk of **CUMULATIVE TRAUMA INJURY** OVER TIME.

Tragically, the U.S. Bureau of Labor Statistics reported **850** FATAL FALLS AT WORK IN 2021.

36% OF **CONSTRUCTION FATALITIES** RESULT FROM FALLS, making it the leading cause of death in the industry, according to OSHA.

FATAL INJURIES AT WORK COST BUSINESSES APPROXIMATELY
$1.34 MILLION PER INCIDENT
ACCORDING TO THE NATIONAL SAFETY COUNCIL

DAYS AWAY FROM WORK DUE TO OCCUPATIONAL INJURIES

	FALLS, SLIPS, TRIPS	OVEREXERTION, BODILY REACTION	FALLS FROM HEIGHT
TOTAL INJURIES:	227,760	295,830	49,250
TYPICAL DAYS LOST:	14	14	22

RISING ABOVE RISK

LESS FATIGUE AT HEIGHT

AVERAGE MUSCULAR ELECTRICAL [EMG] SIGNALS PER MINUTE

- 16 [EMG] LOW-LEVEL ACCESS LIFT
- 43 [EMG] PODIUM
- 82 [EMG] LADDER

MORE PRODUCTIVE

3X FASTER COMPLETION OF TASKS WITH LOW-LEVEL ACCESS PRODUCTS

LOOK FORWARD. MOVE UPWARD.

Rethink work at height and boost your bottom line with the expanded family of low-level access lifts from JLG.
